

MON VINCENT VIÑAS

R&D Engineering Team Lead | Full Stack Developer

v.mon.vincent@gmail.com • +63 906 508 5610

PROFESSIONAL SUMMARY

Full Stack Developer and R&D Engineering Team Lead with 5+ years of experience in enterprise education technology. Sole R&D developer responsible for researching, designing, developing, supporting, and integrating new modules and capabilities into Quick-Campus, an integrated ERP/CRM/SIS/LMS education-management ecosystem. Experienced in end-to-end feature ownership, client-driven enhancements, database design, system integration, Linux environments, Git workflows, AI/LLM features using Ollama, data analytics, technical support, and pre-sales product demonstrations.

PROFESSIONAL EXPERIENCE

Aug 2022 – Present

R&D Engineering Team Lead | Datamobility Corporation

- Serve as the sole R&D developer responsible for researching, designing, developing, supporting, and integrating new modules and product capabilities into the company's Quick-Campus enterprise education platform.
- Develop and maintain integrated capabilities including the Learning Management System (LMS), AI chat support, generative lesson creation, and Data Analytics within the broader ERP/CRM/SIS ecosystem.
- Provide ongoing technical support and enhancement development for assigned modules, troubleshooting client-reported issues and implementing requested options, workflow improvements, reports, filters, visualizations, and other feature changes.
- Develop and integrate locally hosted AI capabilities using Ollama and large language models, including in-platform chat support and AI-assisted lesson-content generation.
- Own development and support of the Data Analytics module, delivering descriptive analytics and dashboards using operational and educational data from integrated systems.
- Handle end-to-end implementation across requirements analysis, prototyping, database design, backend and frontend development, system integration, testing, troubleshooting, deployment support, and continuous enhancement.
- Use Git for professional source-control workflows and work in Linux-based development and server environments.
- Conduct technical pre-sales product demonstrations for prospective clients, present new features to existing clients, and represent the company at selected school, education, and technology events.

Jun 2021 – Aug 2022

Programmer Analyst | Datamobility Corporation

- Supported Campus Operations and existing Quick-Campus modules through programming, application maintenance, database work, troubleshooting, and feature enhancements.
- Provided direct client-facing technical support for assigned systems and modules, investigating issues, gathering requirements, and implementing fixes, requested changes, and application improvements.
- Conducted online product demonstrations and technical presentations for prospective clients as part of pre-sales activities, explaining system workflows, features, and technical capabilities.
- Presented new features and system updates to existing clients and participated in school and technology events to demonstrate the platform and support customer engagement.

CORE SKILLS

Development: PHP, JavaScript, HTML, CSS, jQuery, MySQL, Full-Stack Web Development

Tools & Environment: Git, Linux, Source Control, Linux-based Development and Server Environments

AI & R&D: Ollama, Large Language Models, Local LLM Integration, Generative AI, AI Chat Support, AI-Assisted Content Generation, Technical Research & Prototyping

Enterprise Systems: ERP/CRM/SIS Integration, LMS Development, Enterprise Application Integration, Module Development, Database Design

Data & Analytics: Data Analysis, Descriptive Analytics, Dashboard Development, Reporting, Data Visualization

Client & Product: Technical Support, Client-Driven Enhancement Development, Requirements Analysis, Technical Pre-Sales, Product Demonstration, Customer-Facing Technical Communication

EDUCATION & LANGUAGES

2-Year Computer Science | Asian Institute of Computer Studies - Taytay | 2011

English | Tagalog
